Education

Jodhpur Institute of Engineering and Technology

Bachelor of Technology in Computer Science Engineering; CGPA: 9.4/10.0

Jodhpur, Rajasthan

Expected May 2027

Delhi Public School

Senior Secondary (12th): 76%; Secondary (10th): 60%

India

Graduated 2023

Experience

MERN Stack Development Intern

May 2024 – June 2024

HexSoftwares

Remote

- Selected as top performer among 25+ interns for delivering production-ready code 2 weeks ahead of schedule
- Built e-commerce platform frontend handling 1,000+ products using React.js with Redux, reducing initial load time from 4.2s to 2.5s through code splitting and lazy loading
- Achieved 98% UI consistency across Chrome, Firefox, Safari, and Edge by implementing CSS Grid and Flexbox with comprehensive media queries for 5 device breakpoints
- Reduced API response time by 35% through debouncing search queries and implementing request caching with localStorage

Projects

Facial Recognition Attendance System | React.js, Node.js, MongoDB, Python, OpenCV, dlib

- Built attendance tracking system processing 50+ faces in under 3 seconds with 95% accuracy using dlib's ResNet-34 model
- Decreased manual attendance processing time by 80% through automated face detection and Excel export generation
- Designed Express.js API handling 500+ daily requests with MongoDB indexing, reducing query response time by 60%
- Implemented JWT authentication and bcrypt encryption for admin and user dashboards, securing 200+ user accounts

Multimodal Emotion Detection System | React.js, Node.js, TensorFlow, OpenCV, Librosa

- Developed emotion analyzer processing video, text, and audio inputs with 85% classification accuracy using CNN and transformer models
- Trained facial expression recognition model on 28,000+ images from FER-2013 dataset, achieving 82% validation accuracy
- Integrated VADER sentiment analysis and Librosa for prosodic voice detection, analyzing 3 data modalities simultaneously
- Created WebSocket streaming architecture supporting real-time emotion analysis for 10+ concurrent users

Student Planner Mobile Application | Kotlin, Android Jetpack, Room Database, MVVM

- Launched Android app with schedule manager, task tracker, notes system, and GPA calculator supporting 4-point and 10-point scales
- Reduced code redundancy by 30% through MVVM architecture with LiveData and ViewModel components
- Achieved offline-first functionality using Room Database with 15+ optimized SQL queries for instant data retrieval
- Decreased app crashes by 90% through null-safety features and comprehensive error handling in Kotlin

College Information Portal | React.js, Node.js, REST API, Yup Validation

- Created responsive website with feedback system, image gallery, course catalog, and multi-step admission form
- Reduced form submission errors by 75% using Yup schema validation with real-time error messaging
- Integrated email notification API processing 100+ inquiries per week with 99% delivery rate

Technical Skills

Languages: JavaScript, Java, Python, C, Kotlin, SQL, HTML5, CSS3

Frontend: React.js, Redux, React Hooks, Responsive Design, Bootstrap, Tailwind CSS, Material-UI

Backend: Node.js, Express.js, RESTful APIs, JWT, Middleware Design

Databases: MongoDB, MySQL, Query Optimization, Schema Design

Tools: Git, GitHub, Postman, Docker, VS Code, npm, Android Studio, Webpack

ML/AI: TensorFlow, Scikit-learn, OpenCV, dlib, Face Recognition, Computer Vision, NLP

Mobile: Android (Kotlin), Jetpack, MVVM, Room Database, Material Design

Achievements

Top Performer Award – HexSoftwares MERN Stack Internship	2024
5-Star Certifications in C Programming and Java – HackerRank	2024
GUI Development with Tkinter and Advanced C Programming – Infosys Springboard	2023-2024
IoT Laboratory Training Certificate – JIET	2024
Solved 150+ problems on LeetCode; active contributor on CodeChef	Ongoing
